Profile

- As a recent graduate in Information and Communication Technology, I bring a solid foundation in technology and a passion for web development. My academic journey has equipped me with a comprehensive understanding of information systems, programming languages, and communication technologies. Proficient in key front-end technologies such as HTML, CSS, and JavaScript and React.js, I am eager to transition theoretical knowledge into practical solutions. During my studies, I undertook projects that involved Tailwind CSS and demonstrated my ability to adapt and learn quickly. I am excited to contribute my skills, enthusiasm, and dedication to a dynamic team, with a keen interest in continually expanding my expertise in the rapidly evolving field of web development.

Education

Pandit Deendayal Energy University, Gandjinagar   **2021-2025**
- Information and Communication Engineering | CGPA: **9.2**

  Courses : Data Structure, Operating System, Object Oriented Programming, Database Management System, Design And Analysis of Algorithm, Theory of Computation ,Digital Electronics, RF Engineering

Parth School of Science, India   **2020-2021**
- GSHSEB (Class XII), Aggregate:79.82%

Shree Narayana Vidhyalaya, India   **2018-2019**
- GSEB (Class X), Aggregate: 90%

Skills

Programming Language : C++ | C | JavaScript | NodeJS | React | MySQL | Git | HTML | CSS

Web Development tools : npm, Tailwind CSS, GitHub

Coding Practices : Understanding of clean code principles

Soft Skills : Communication skills, Team collaboration Adaptability and willingness to learn, Time management and

organizational skills

Projects

Weather API   **Dec'2023**
Welcome to my Weather Detection Webpage, where simplicity meets functionality. Leveraging the power of Open Weather API, this user-friendly site provides real-time weather updates effortlessly. The clean and responsive design ensures a seamless experience, complemented by a search functionality for specific location weather queries

- Integration with Open Weather API : Leveraging the Open Weather API demonstrates technical proficiency and the ability to integrate external data sources seamlessly.
- Technological Stack : The use of HTML, CSS, and JavaScript underscores a well-rounded skill set in web development.
